ASX RELEASE

DroneShield Awarded Additional US Patent

- DroneShield has been awarded an additional patents by the United States Patent and Trademark Office.
- Patent relates to the Company's groundbreaking developments in the acoustic detection of drones.

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to confirm it has been granted an additional patent by the United States Patent and Trademark Office.

The patent (number 10,032,464) relates to acoustic detection of drones, specifically drone detection and classification with compensation in background clutter sources.

In addition to this patent, the company has a number of other assets in its drone security IP portfolio, including four previously granted US patents. All of the IP assets relate to the counterdrone technologies.

Peter James, DroneShield's chairman commented: "DroneShield continues to protect our position in the sector by executing on the patent strategy in the critical areas of the business, as we seek to lead the counterdrone space globally, as evidence by the recent record order for \$3.2m of our counterdrone equipment for use by a major Middle Eastern Ministry of Defence."
