FY18 performance

- Fourth consecutive record annual production 135 koz (FY17: 116 koz) and record low AISC A\$1,068 /oz (FY17: A\$1,187 /oz)
- Improved grade (FY18: 1.25 g/t Au, FY17: 1.13 g/t Au) and recovery (FY18: 85%, FY17: 82%)

FY19 guidance

- Production of 105 to 115 koz
- AISC¹ of A\$1,275 to A\$1,375/oz
- Sustaining capex: A\$8 to A\$10 M
- Refurbishment of Ropecon and replacement of older trucks will impact costs and production

New Life of mine plan

- Recent work on Simberi's life of mine plan has extended oxide mine life to the end of FY21
- Mining continues through FY19 and FY20
- Low grade stockpiles accumulated over FY18 to FY20 to be processed in FY21

Initial 2 year option period to Nov 2018

- Project includes new ventilation shafts and paste aggregate fill (PAF)
- Budget of A\$100 million with planned completion in Q2 December FY20¹
- FY19F capex of A\$55 to A\$58 million
- A\$10M capex spent in Q4 June FY18
- Raise bore activities progressing to schedule with second surface shaft pilot hole drilling due for completion late July
- Plan now anticipates some concurrent raiseboring of vent shafts to allow early completion
- PAF completion now due Q2 Dec FY19

1. GEP additional ventilation per ASX release 27 March 2017 "Gwalia Extension Project approved". For full details refer to ASX Announcement "Gwalia mine medium and long-term outlook" released 21 February 2018 and Q4 June FY18 Quarterly Report.
 2. Corp. allocation normally included in AISC as published by St Barbara Ltd (Leonora proportion of Corp. allocation in FY19F approx. A\$20M). Corp. allocation excluded from GMX AISC/oz outlook for transparency.

- GWDD19A has been completed, intersecting four mineralised zones between 2,630-2,690 mbs.
- Results confirm Gwalia ore lodes are continuous to 2,700 mbs.

Pinjin, WA

- Completed 313 hole Aircore drill program in Q4 June FY18, testing six targets: Graham's Find, Yindi Station, Old Homestead, Mulgabbie and reconnaissance drilling at two new targets.
- A follow up 300 hole lake aircore drilling program commenced in Q4 June FY18.

Tabar Islands, PNG

- **Simberi Island:** Shallow drilling for sulphide gold under Sorowar, first results received. Cu-Au drilling below mining area initial results received, drilling ongoing. Deep drilling for sulphide gold, results pending.
- **Newcrest Farm-in** activities continued, with a total of four deep diamond drill holes completed to date at Talik North and Kupo on Tatau Island.
- Diamond drilling at Banesa on Big Tabar Island is expected to commence in Q1 Sep FY18, subject to access.

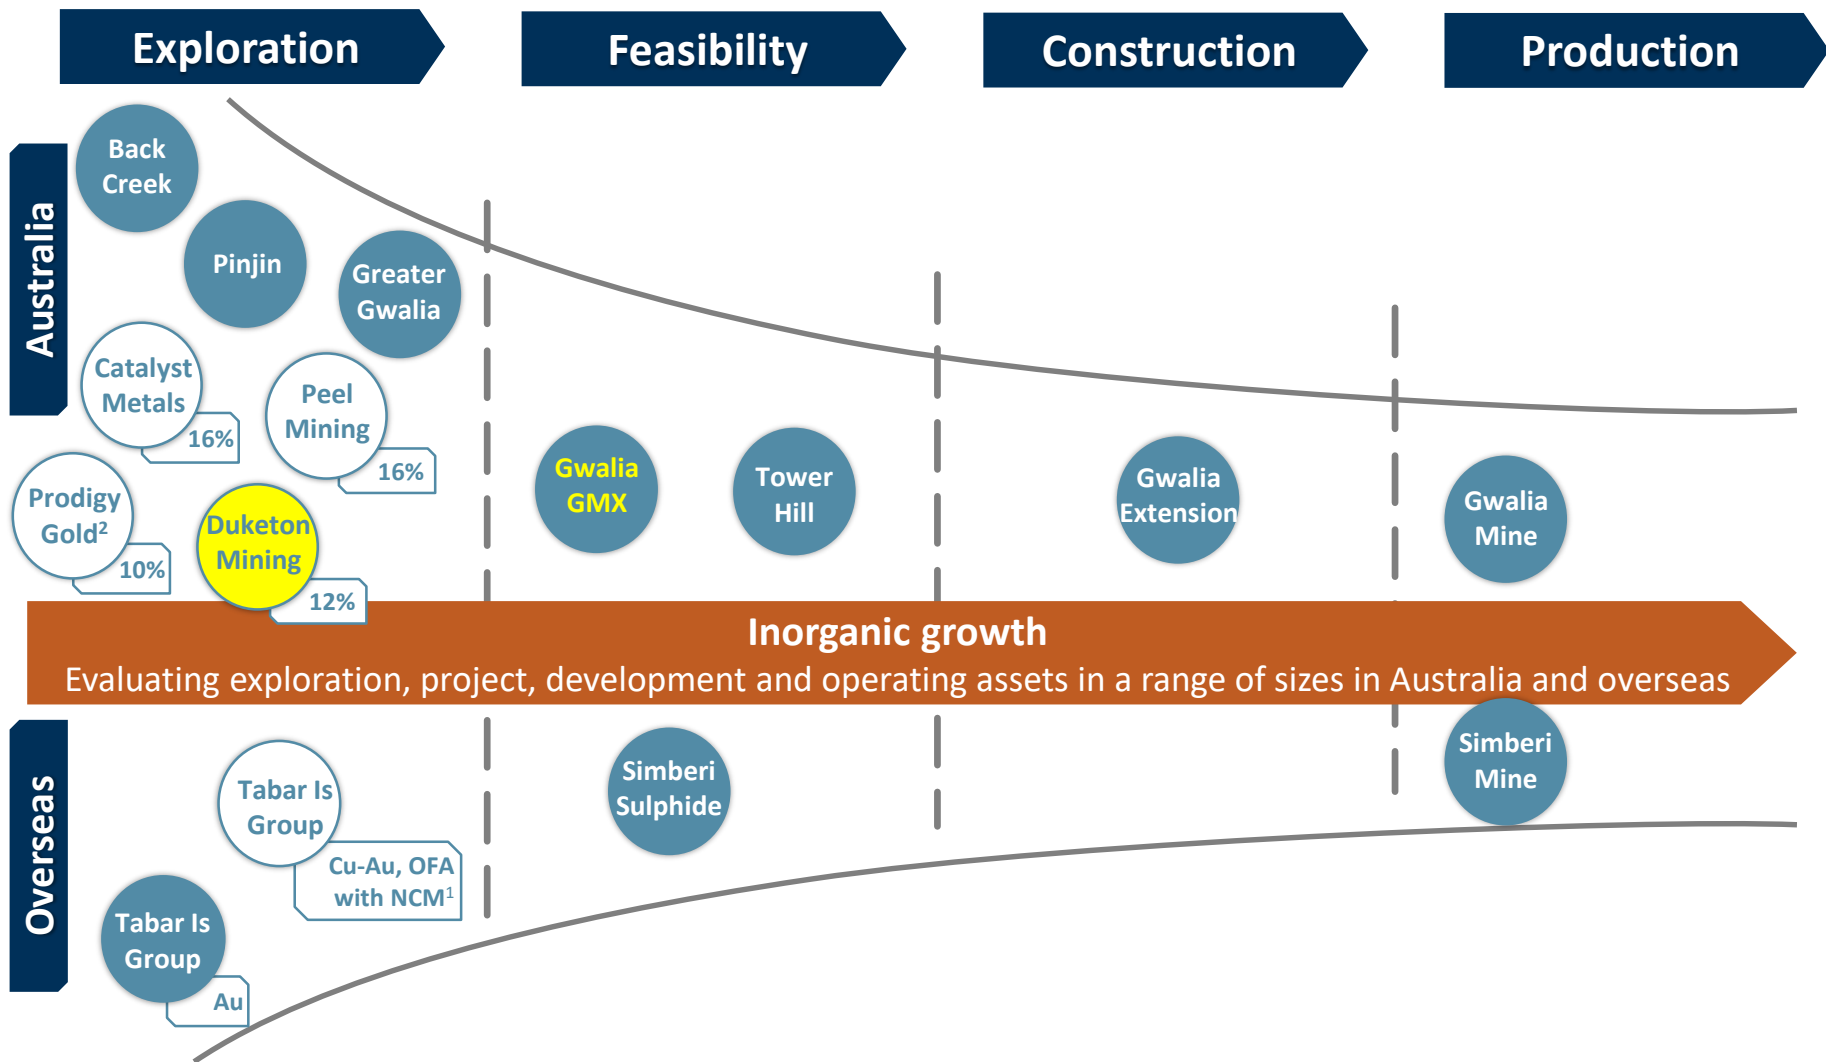

Back Creek, NSW

- Aircore drill program consisting of 23 holes testing two targets.
- Drilling to commence in July.

Exploration Results

The information in this presentation that relates to Exploration Results for Simberi and Pinjin is based on information compiled by Dr Roger Mustard, who is a Member of The Australasian Institute of Mining and Metallurgy. Dr Mustard is a full-time employee of St Barbara and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Mustard consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this presentation that relates to Exploration Results for Gwalia and the Leonora region is based on information compiled by Mr Robert Love, who is a Fellow of The Australasian Institute of Mining and Metallurgy. Mr Love is a full-time employee of St Barbara and has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Love consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

Mineral Resource and Ore Reserve Estimates

The information in this presentation that relates to Mineral Resources or Ore Reserves is extracted from the report titled 'Ore Reserves and Mineral Resources Statements 30 June 2017' released to the Australian Securities Exchange (ASX) on 23 August 2017 and available to view at www.stbarbara.com.au and for which Competent Persons' consents were obtained. Each Competent Person's consent remain in place for subsequent releases by the Company of the same information in the same form and context, until the consent is withdrawn or replaced by a subsequent report and accompanying consent.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original ASX announcement released on 23 August 2017 and, in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the original ASX announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original ASX announcement.

Full details are contained in the ASX release dated 23 August 2017 'Ore Reserves and Mineral Resources Statements 30 June 2017' available at www.stbarbara.com.au.

We supplement our financial information reporting determined under International Financial Reporting Standards (IFRS) with certain non-IFRS financial measures, including cash operating costs. We believe that these measures provide meaningful information to assist management, investors and analysts in understanding our financial results and assessing our prospects for future performance.

- Cash operating costs**
- Calculated according to common mining industry practice using The Gold Institute (USA) Production Cost Standard (1999 revision).
Refer most recent quarterly report available at www.stbarbara.com.au for example
- All-In Sustaining Cost**
- All-In Sustaining Cost is based on Cash Operating Costs, and adds items relevant to sustaining production. It includes some, but not all, of the components identified in World Gold Council's Guidance Note on Non-GAAP Metrics - All-In Sustaining Costs and All-In Costs (June 2013).
Refer most recent quarterly report available at www.stbarbara.com.au for example
- Cash contribution**
- Refer cash movements table in Finance section of corresponding Quarterly Report. It is the sum of 'operating cash flow' from individual operations, net of sustaining capital expenditure.
